# Conspiracy

## First Blood

This whole situation reeks of conspiracy
We can't erase The lives all the lives
That were lost all the memories
You can't erase Your ties all your links
All your ties with the enemy
Some see through all the propaganda

Others unite they stand by your side
And when this plan was pulled off with
Precision, how could you think
No suspicions would rise
So many pieces so perfectly aligned

Coincidence? The facts will blow your Mind
Control machine is all you see
'Til you believe to fund the war machine
As history repeats itself again
This quest for truth will never end
Let us ask the real questions
For the victims who died

Let us ask the real questions
All our chances denied
What made them fall? The answers, hidden from all
And why weren't they warned?
All those who perished answered their call
Let us ask real questions
For the victims who died

---
