

Add Me In

Chris Brown

Your body's an isosceles
And I'm just tryna try angles
Your love is trigonometry

Just tryna solve the whole equationWhat's it about you (about you) I wanna love you

Picking you up, picking you up, so I can touch you

Should we do that? Can I do that? (baby)

Answers are usually in the bedSubstitution, add me in

Multiply my love, is that too much?

Substitution

What's the problem, girl? Add me in (yeah)Baby just add me, baby just add me in
Baby just add me, baby just add me inI'll calculate her home invasion (girl, add it up)

Divide your legs and count to 3 (3, 2, 1, come on)

He's just not the answer baby

And that's just my hypothesis (real talk)What's it about you (about you) I wanna love you

Picking you up, picking you up, so I can touch you

Should we do that? Can I do that? (baby)

Answers are usually in the bedSubstitution, add me in

Multiply my love, is that too much?

Substitution

What's the problem, girl? Add me in (yeah)But if I said I loved you, (baby pick me) I need you

Would you care?

So many things that I could learn

Baby if we do the math, it will equal up to me!Substitution, add me in

Multiply my love, is that too much?

Substitution

What's the problem, girl? Add me in (yeah yeah, ooh)Substitution, add me in (add me)

Multiply my love, is that too much?

Substitution

What's the problem, girl? Add me in, add me in ohBaby just add me, baby just add me in (baby just add me in)

Baby just add me, baby just add me inBaby just add me, baby just add me in

Baby just add me, baby just add me in
