

# Evilution

# Stuck Mojo

I watch you be consumed by your own weakness  
It's a sickness and I've been a witness  
No pride no respect the image you project

It's a sickness and I've been a witness  
The sickness inside of you It eats you deletes you It rapes you it breaks you  
The haze that you live in I watch you travel down the path of evilution

Your words they sicken me

Where's the solution  
The life you lead is soulless pollution

You seem to live your life in total confusionStep up, you can front if you want toYou're a slave and a slug to  
your favorite drugYou're half a man, your own biggest fan

I often visualize this worldWithout your filthy presence

And I stand pissin' on your graveWithout a sense of reverenceA disease of societyStranger to sobrietyYou're  
half a man, your own biggest fan
