

# Sane

## For King And Country

Crack the head against the wall  
It's a never over 'til you've killed the manic expression one for all  
Stand too tall  
Terror skinned him to the bone  
He saw the liberia and liked to say I'd make it on my own  
My way home  
You keep me sane  
You keep me sane  
Save enough or suffer you  
Strong enough to see it through  
I wonder you  
Scratch the eyes enough to see  
All the misery has been around as I pretend to be  
Starve free
