It's The Nighttime

Josh Rouse

You play your stereo loud
You've got your headphones on
I see you dancing around
To your favorite songIt's 'Who Do You Love'
I wanna know his name
And does he feel like I feel
Is he standing in the rain?I'm out in the street
The city lights above
It's the night time, baby
Don't let go of my loveYou've come a long way, baby
From your days at school
I heard you're really living uptown
I'm just a downtown foolAnd would it be alright
If I took you for a ride
Took you out on the town
Maybe someplace niceOut in the street
City lights above
It's the night time, baby
Don't let go of my loveAnd maybe later on
After the late, late show
We can go to your room
I can try on your clothesYou know I'm not the kind of man
To come on so strong
But when you look as good as you do
I knew it wouldn't be longI'm out in the street
The city lights above
It's the night time, baby
Don't let go of my loveIt's the night time, baby
Don't let go of my love
Yeah, it's the night time, baby
Don't let go of my love, loveDon't let go of my love
