

# trip switch

## Nothing But Thieves

Sharing secrets with another world  
Rubbing shoulders with some unknown lovers  
Making waves through the universe  
Starting wars with anonymous brothers  
Trip switch, trip switch  
Make a wish and I'll count to three  
Press the button and we'll both be happy  
Sending signals is a dirty trick  
I get my love in a digital packet  
Trip switch, trip switch What we do when the power's out  
What do we do when the lights go down?  
What we do when the power's out  
What do we do when the lights go?  
Down, down, down, down, down, when the lights go  
Down, down, down, down, down, lights go Gimme data 'cause I need a hit  
How I love stratospheric numbers  
Information, I've been craving it  
Gimme yours then gimme all the others  
Trip switch, trip switch What we do when the power's out  
What do we do when the lights go down?  
What we do when the power's out  
What do we do when the lights go?  
Down, down, down, down, down, when the lights go  
Down, down, down, down, down, the lights go They put out the lights, they put out the lights  
They put out the lights What we do when the power's out  
What do we do when the lights go down?  
What we do when the power's out  
What do we do when the lights go?  
Down, down, down, down, down, lights go What we do when the power's out  
What do we do when the lights go?  
What we do when the power's out  
What do we do when the lights go?  
Down, down, down, down, down  
Down, down, down, down, down, when the lights go down
