

Spread Your Wings

Gotthard

I keep looking back this long winding track
Times that we shared, how much I cared, how much I care
No I can't forget or ever regret the way it used to be
Living and just rolling free, just rolling free Now it's time, feel the wind
Climb the vine, say goodbye
And I know what will be
I can't see you this way anymore Spread your wings and fly
On your way up, you will go on
And spread your wings and shine
On your way up, go and light up the raining sky, light up the sky
I gotta replay everything every day, all best of times
Wanna keep them all inside my mind, I gotta keep it all in my mind
I know it ain't fair to wanna keep you there
Heart on my sleeve, I gotta let you leave, I gotta let you leave Now it's time, feel the wind
Climb the vine, say goodbye
And I know what will be
I can't see you this way anymore Spread your wings and fly
On your way up, you will go on
And spread your wings and shine
On your way up, go and light up the sky
Spread your wings and fly
On your way up, you will go on
And spread your wings and shine
Spread your wings and fly
On your way up, you will go on
And spread your wings and shine
On your way up, go and light up the raining sky, light up the sky
