

Gore

Deftones

Deep in this dream we are locked in
I've pulled you in
Now our bodies are wet
There is blood on the beaches
I brought you into this, don't deny yourself Smile now you're all set
Surprise you're now one of the gang
Take what you want to take
Surprise you're now running the game We lay in the gore of our vices
Oh we writhe in them
At night we assemble the hunt for your prizes
I hooked you in this way
You should try yourself Smile now you're all set Surprise you're now one of the gang
Take what you want to take
Surprise you're now running the game
We'll slip right through these gates together someday Lost in these dreams we arrive in
I know you will
Develop the taste that will tie us together
I put you in this game
Just remind yourself Smile now you're all set
Surprise you're now one of the gang
Take what you want to take
Surprise you're now running the game
Smile now you're all set
Surprise you're now one of the gang
Take what you want to take
Surprise you're now running the game We'll slip right through these gates together someday
We'll slip right through these gates together forever Smile now you're all set
Surprise you're now one of the gang
Take what you want to take
Surprise you're now running the game
Smile now you're all set
Surprise you're now one of the gang
Take what you want to take
Surprise you're now running the game Surprise you're home
