

# Out Of Routine

## Idlewild

Out of routine and the explanations you have  
You're still loath to give them  
All because you phrased them in a way  
So the explanations you have, the words don't go away  
If your heart gets in the way of what you wanted  
To deny everything I say is not uncommon  
The only thing that's definitely forgotten is what you wanted  
And what you really needed  
But I can only try to know what I wanted  
I will only try to know what I want  
If I can only try to know what I wanted  
How can it be gone?  
Out of routine but it's not as bad as you think  
It's only chance you're looking for  
Still in routine and the explanations you have  
The ideas go between  
If your heart gets in the way of what you wanted  
To deny everything I say is not uncommon  
The only thing that's definitely forgotten is what you wanted  
And what you really needed  
But I can only try to know what I wanted  
I will only try to know what I want  
If I can only try to know what I wanted  
How can it be gone?  
And it's already gone and nothing can take it back  
It's already gone and nothing can take it from me, gone
