All In the Mind

The Verve

So I've got in the car, we drove for a mile
I didn't even learn her name
She said, "You've got the money
And I've got the time"Five years later on, she became my lover
Taught me everything I know
She said, "You were born to fly my son"
I said, "Hey! I already know"Because it's all inside
Because it's all inside
I was born to fly, fly pretty highFive years later on, she became my father
Taught me everything I know
She said, "You were born to burn my love"
I said, "Hey! I already know"Because it's all inside
Because it's all inside
I was born to fly, fly pretty highBecause it's all inside
Because it's all inside
I was born to fly, fly pretty highSo waste your time
On people who don't know which way to go there
Never said you were, never said you were up in the sky
Because it's all in the mindJust get in the car, turn out the lights
Don't care who you are
You could be a star or you could be a fool
Don't care what I find, it's all in the mind
