Bring It Down To Earth

Ultramagnetic MC's

Ultramagnetic MC's
I remember the first time I ever seen Ultramagnetic
At Latin QuarterYeah, it's time to come out and give the people
Somethin' they can understand
Somethin' not too complicated
(Cated)
You know what we gon' do?
We gon' bring it down to Earth
(Earth)Bring it down to earth, I don't understand
Bring it down to earth, I don't understand
Bring it down to earth, I don't understand
Bring it down to earth, I don't understandMega bomb ignite, super reflection
Power ignites the Fourth Horseman, turbo
I kick styles like Data, computer reading
Miles away to beam Star TrekMovin' my style up, Optimums level 4
I get it warp speed, yous on my space tour
Get with the elements, eloquent spacecraft
Change my gamma flow, one-three-eight-sevenTwenty-oh-nine-six, cereal silver seven
I got the skills to rap, so what you want Spock?
Style like Captain Kirk, gamma ray one block
Particle leading out, rock the way intercourseDamaging animals, a lady with menopause
Rising at one speed, altitude X be
We need some gas or fuel, yo come in major
I'm just a level or pinch, I'm hittin' New YorkFlyin' with Ced, I see the other world
I need some gas, yo Jim, I gotta come down
Perimeter's reading we might crashBring it down to earth, I don't understand
Bring it down to earth, I don't understand
Bring it down to earth, I don't understand
Bring it down to earth, I don't understandI know you out there and y'all understand
But I'ma let Ced get on and tell y'all what it's really like
It's not so complicated
But connect with me and y'all follow me right on throughYo, Ultra power flowin', get ready for Centron
React with the digital, kicks like loose bombs
High tech C-spects, hit data brain checks
Soundin' like John? Time's up brain testInfo storm, locked like sentry
Buzz, buzz, buzz, it's annoying
So pick up kicks and, flex with the mega mega
Square roots on time, so check, check, check, check
And go as I ignite, the energy will uniteFake attacks for me, hard as I get hype

T-Minus 7 counts, divided by kilograms
Input outputs, the figure is fluid
But some plug censors, replace it with bassIt's kickin' up fiercely, boomin' with heat
While you sneakin' with energy, sound heat sneaks
The chamber the membrane, delirious insane
Now think about it, mm I know it's crazyWith moisture one, and texture seven
The panel's on fire, interference is higher
Delay is in, device is on
Spinnin' that plate, proceed this quick
Some bomb it and quit, then give up on lifeThey just can't handle, the rays of light
They tryin' to see, they move the barriers
They catch the enzymes, becomin' a carrier
They stop they breathin', they hold they breath
Pass out and soon, then they forgetBring it down to earth, I don't understand
Bring it down to earth, I don't understand
Bring it down to earth, I don't understand
Bring it down to earth, I don't understandBring it down to earth, I don't understand
Bring it down to earth, I don't understand
Bring it down to earth, I don't understand
Bring it down to earth, I don't understand
