

# Seventeen

[inc.](#)

seventeen trying to be a hero  
pulled up her skirt in the mirror  
hop in the back turn the corner  
it was too dark to see the water  
lying down in the backroom  
all of the lines that shes used to  
all of the rides that shes used to  
it was alive but it used you  
it was alive but it used you  
it was alive but it never used to  
there was a time when you knew  
so show me a sign if its you  
show me a sign if its you you could stay i could come and find you where you are  
whenever you play you always go too far  
to the river to the edge of the water  
lights turned off in the back of the car  
water in the street, rain in your eye  
i could see the tear but i never heard your cry  
they see you turning know  
their words always let you down it was alive but it used you  
there was a time when you knew  
show me a sign if its you  
show me a sign if its you  
show me a sign if its you  
it was alive in you  
it was alive in you
