

# After All These Years

Rael

After All These Years

It's been so long since the day I saw it in your eyes  
It keeps me from dreaming to have you on my side  
I know, I understand not once did I doubt my heart

Look at the bright side oh baby come on

Seasons may change but my heart wont now

I know we had it all and we know it wont be long  
And this parade of what we have will now come at, at last

Will now come at, at last

Chorus:

After all these years here iam in the midst of certainty

After all these years

Im sure that I will keep you beside me after all these years

After all these years here iam in the midst of certainty

After all these years

Im sure that I will keep you beside me after all these years

I know we had it all this time

All these years that I had with you just feels so right

Seasons come and go still the feeling is all so right

I know, I understand not once did I doubt my heart

Look at the bright side oh baby come on

Seasons may change but my heart wont now

I know we had it all

I don't want to be alone tonight

But if you're running away baby now

Ill be with you tonight

Ill be with you tonight

Chorus:

After all these years here iam in the midst of certainty

After all these years

Im sure that I will keep you beside me after all these years

After all these years here iam in the midst of certainty

After all these years

Im sure that I will keep you beside me after all these years

I know we had it all this time

I know we had it all

I don't want to be alone tonight

But if you're running away baby now

Ill be with you tonight come on

Ill be with you tonight
