Wheels of Fire

Manowar

Since the dawn of time I've rolled across the earth Spinning in the dust Long before your birth Eating tar and gasoline Every light I see is green Open pipes, my machine's Triple plated chrome Spirit of the wheelWheels of fire burn the night Ride across the sky Wheels of fire burning bright We live to rideMotors running Now you're gonna learn Waiting on the line Make your tires burn Faster, faster, faster Speeding always kills Nothing else takes us To get these thrills

Spirit of the wheelWheels of fire burn the night Ride across the sky

Wheels of fire burning bright We live to ride ohBlood and thunder on the road My heart is pounding My blood's Nitroglycerin I'm fire

Burning, burning, burning Ready to explode Don't want nothing left of me To scrape off the road Spirit of the wheelWheels of fire burn the night

> Ride across the sky Wheels of fire burning bright We live to rideClouds of smoke Tires screaming

Fire in my hair Blown into a thousand pieces Scattered everywhere Fast, burn, burning, faster

Wanna take a ride
Spirit of the wheel
Wheels of fire ride
Spirit of the wheelWheels of fire burn the night
Ride across the sky
Wheels of fire burning bright
We live to ride
Wheels of fire burn the night
Ride across the sky
Wheels of fire burning bright
We live to ride
