There Is A Light

We The Kings

There is a light
Coming from the clouds
I want to see further
Than they'll allow
Go to bed now
They'll be here soon
To bring us all presents
If we were good
And take me where we need to go to find a little snow
Out where the fire logs will need a little spark to grow
And tell me to close my eyes to quickly fall asleep before you know shows
He'll be here soon
And take me where we need to go to find a little snow
Out where the fire logs will need a little spark to grow
And tell me to close my eyes to quickly fall asleep before you know shows
He'll be here soon
There is a light
Still coming from the clouds
I want it to be here
I want it right now
Oh cause I'm sick of the cold

And waiting for tomorrow
And I've been waiting all year, all year
Swear I was good
(oh)
Take me where we need to go to find a little snow
Out where the fire logs will need a little spark to grow
And tell me to close my eyes to quickly fall asleep before you know shows
He'll be here soon
And take me where we need to go to find a little snow
Out where the fire logs will need a little spark to grow
And tell me to close my eyes to quickly fall asleep before you know shows
He'll be here soon
He'll be here soon
And take me where we need to go to find a little snow
Out where the fire logs will need a little spark to grow
And tell me to close my eyes to quickly fall asleep before you know shows
He'll be here soon

And take me where we need to go to find a little snow
Out where the fire logs will need a little spark to grow
And tell me to close me eyes to quickly fall asleep before you know shows
He'll be heye soon
He'll be here soon
