# CIA

## Bruce Fowler

Mama, mama don't look now, I'll say it when
There's a red bus and it's comin' up along
And I might recommend that when the protests are over
You will not expect to be so well
When the capital is crowded with effigies
And they might do you in
If you don't know your country
Don't you ever let us down CIA
I know you'll never let us down CIA
As you sit on the crowd and keep them workin'
And say again
Mama, mama don't you see?
'Cause it's just one of them lonely days
When we say how we fear
And the last fence has fallen

You will not expect to be
So welcome to life of a foreign national
Where are the Americans now?
That they fractured your country
Don't you ever let us down CIA
I know you'll never let us down CIA
As you sit and call in sick
Your empire needs protectin'
Since you fractured your country
Don't you ever let us down CIA
I know you'll never let us down CIA
As you sit and call in sick
Your empire needs protectin'
Your empire needs protectin'
Your empire needs
