Speed (Club Version)

Covenant

give me, give me the speed I need
i want more life, don't need this state to last
I want more to burn, I want more to break
so give me the speed I need
my own movements feel so strange
are we all insane, ir is it only me?
believing, believing in the free will
to last, to burn, to die
fail against my domination
learn the sweetness of my mercy
guide my reckless steel
let go, let go, unknown mind
motions, actions from a pure mind
a rare thing! a wise thing?
so begin, move, crush
so restless, dayless, always
fail against my domination
learn the sweetness of my mercy
guide my reckless steel
make me feel
or fix my speed
