## **One More Night**

## Cascada

You are all I can remember After all that we've been through Forever in my heart Now I'm through And June feels like November So can't believe it's true Too long we've been apart One more night I wanna be with you Where I wanna hold you tight It feels so right tonight So leave it up to you And I think the time is right To stop the fight One more night I wanna be with you Where I wanna hold you tight It feels so right tonight I'll leave it up to you And I think the time is right To stop the fight Why can't true love be forever? Why did my dream explode The day you went away? 'Cause I will keep the spell together I wish you well of hope A girl from yesterday One more night I wanna be with you Where I wanna hold you tight It feels so right tonight So leave it up to you And I think the time is right To stop the fight One more night I wanna be with you Where I wanna hold you tight It feels so right tonight So leave it up to you And I think the time is right To stop the fight {Go, hey yo, check it out now}
