Electrified

Sara Paxton

Sometimes when you're around
I wonder if time is standing still
I knew right when you walked by
Your smile was overcoming me
I found out you were taken
Together with somebody else
I'm playin with fire
Blisters forming in my handsI've got my life to give
So strong when we first kissedI would be so lucky if I can
Just be around you as a friend
I would be the one who'd always be electrified
People come together and grow apart
And I always knew this from the start
That I would be the one who'd always be electrifiedHe said "my way or the highway"
Push that pedal to the floor
I'ts over now and maybe never
I'm in reason when out the door
The mornings go I scream
"Come stay with me"
But I know it's just a lie
Not meant to be
Together
ForeverI would be so lucky if I can
Just be around you as a friend
I would be the one who'd always be electrified
People come together and grow apart
And I always knew this from the start
That I would be the one who'd always be electrifiedAnd I say "no more"
It's turning me apart to see you
Hitting me so low
When I don't care about tomorrow
Now that I know more
Than I ever wanted to know
But my heart is still going out to youSometimes when you're around
I wonder if time is standing still
I knew right when you walked by
Your smile was overcoming me
The mornings go I scream
"Come stay with me"

But I know it's just a lie
Not meant to be
Together
ForeverI would be so lucky if I can
Just be around you as a friend
I would be the one who'd always be electrified
People come together and grow apart
And I always knew this from the start
That I would be the one who'd always be electrifiedI would be so lucky if I can
Just be around you as a friend
I would be the one who'd always be electrified
People come together and grow apart
And I always knew this from the start
That I would be the one who'd always be electrified
I would always be the one to be electrified
I would always be the one to be electrified
I would always be the one to be electrified
