Gold Blood

Kids In Glass Houses

So we start at the end where it makes more sense
We've been digging our graves by night and by day
Cause the streets are not ours and the water's sour
Cause we had the whole world, every boy and girl
(And we've nothing at all to show it)
When the sun went out
When the gates crashed down
When the golden gods and clowns
Came out to save you
In gold blood
In gold blood
In the back of broke cars
Force a moment that's our
And we paint on the face that makes us feel safe
When the good and the great tell death he can wait
Cause we had the whole world, every boy and girl
(And we've nothing at all to show it)
When the sun went out
When the gates crashed down

When the golden gods and gods
Came out to save you
In gold blood
In gold blood
In gold blood
When the sun went out
When the gates crashed down
When the golden gods and monsters
Came out to get you
In gold blood
In gold blood
In gold blood
When the sun went out
When the gates crashed down
When the golden gods and monsters
Came out to get you
In gold blood
In gold blood
In gold blooooooood

In gold blood
