

State Executioner

G.B.H.

State executioner, there's no hope
For the men that hang on the end of your rope
You think you're safe, no one can tell
What they'll do when you get to hell?
State executioner Got the papers, you need your boss
That man is not guilty, you don't give a toss
Pull the lever, watch him swing
State executioner, murderous king
State executioner, just the same
As the people you kill in the government's name
Slip on the hood, open the hatch
You're no better than those you dispatch
