

We've Got It

Cults

I bet you think that you're the only ones
That the brightest lamps all keep on burning for you
You keep on leaving love a smoking gun
Go on and let 'em talk we'll give them something to do We've got it (2x)
And we won't be your problem anymore
We've got it (2x)
Oh, no more There's no one else for me but you
There's only you my love
There's no one else that's really here
There's only you my dear (2x) Do you believe that what is done is done
That you can come so far and never leave them a clue We've got it (2x)
And we won't be your problem anymore
We've got it (2x)
Oh, no more We're not here waiting up for you
There's no more time for that
We're not here praying just for you
There's no more tears to lean on We're not here waiting up for you
Just you remember that
We're not here praying just for you
There's no more tears to cry for you [There's no one else for me but you
There's only you my love
There's no one else that's really here
There's only you my dear] (2x)
