Paradigm Shift

Galactic Cowboys

Unsettled, angst driven, disaffected generation
Hastened by the joy of laughter
Fall away from ever afterSomething's happening there
Something's happening there
Something's happening thereUnstill and borrowed
The more you know, the more you sorrow
Abandoning the search for meaning
If every failure amounts to nothingSomething's happening there
Something's happening there
Something's happening thereSomething's happening there
Something's happening thereMy My, Hey Hey...
The kids have found a place to play
Geeks and freaks and creeps and paupers
Fall away from what you offerSomething's happening there
Something's happening there
Something's happening there
Something's happening thereSomething's happening there
Something's happening there...yeah!
