

Space Cadet

Kingdom Cloud

I'm standing alone on the cliffs of the world

 No one ever tends to me

 Sitting alone, covered in rays

Some things are so my mind can breathWaiting is hard, fucking takes so long

 Draped in sun, hands in sand

 Earth acid cleanses me, cleanses me clean

 But the world it never comesIt never comes

 It never comes

It never comesI lay on my side in the edge of the room

 She never expects anything from me

 When all the days, the days of the year

I know I miss that part of meWaiting is hard, fucking takes so long

 Draped in sun, hands in sand

 Earth acid cleanses me, cleanses me clean

 But the world it never comesIt never comes

 It never comes

 It never comes

 It never comes

 It never comes
