Stay

PFR

We don't have to say a word
Sometimes it's better when we don't
Apologizes aren't always heard
Sit beside me through the storm
The cloud above will take another formIt would be so easy
For you to walk away
All that I can tell you
Is I want you to stayForget that man I was before
My eyes are open to the sky
My back lay flat against another shore
I can't erase mistakes I've made
And I can't stand to have them bring you painIt would be so easy
For you to walk away
All that I can tell you
Is I want you to stayThe clouds are empty, they roll away
The sky is silent, I am amazed
That you are still sitting here
When you could have left me to drift awayIt would be so easy
For you to walk away
All that I can tell you
Is I want you to stayWe don't have to say a word
Sometimes it's better when we don't
