

# Good News First

## Rush

The best we can agree on  
Is it could have been worse  
What happened to your old  
Benevolent universe? You know the one with stars  
That revolve around you  
Beaming down full of promises  
To bring good news You used to feel that way  
The saddest words you could ever say  
But I know you'll remember that day  
And the most beautiful words I could ever say  
And the most beautiful words I could ever say The worst thing about it all  
Is that you might have been right  
And I'm still not really sure  
What started that fight And I still get this feeling  
There's more trouble ahead  
So never mind the bad news  
Let's have the good news instead You used to feel that way  
The saddest words you could ever say  
But I know you'll remember that day  
And the most beautiful words I could ever say  
And the most beautiful words Some would say they never fear a thing  
Well, I do  
And I'm afraid enough for both of us  
For me and you Time, if nothing else, will do its worst  
So do me that favor and tell me the good news first  
The good news first You used to feel that way  
The saddest words you could ever say  
But I know you'll remember that day  
And the most beautiful words I could ever say  
And the most beautiful words I could ever say  
To the most beautiful words I could ever say
