Deviate from the Form

Scar Symmetry

I transcend my earthly form
Through some questions never asked before
Question the need to be a machine
That responds automaticallySome words will trigger certain acts
Just one of the commandments we have learnt
Some acts will trigger certain states
I think, it's time to alter the gameI'm changing
You're changing
We're changing from withinDeviate from the form of nothing
Deviate from the norm to something
Deviate from the form of nothing
I deviate, farewell to the tribeI receive clues that lead me
To answers never seen before
And find the final piece
In the puzzle of realitySome words will trigger certain acts
Belief in limitations we have learnt
Some acts will trigger certain states
I'm taking back what I gave awayI'm changing
You're changing
We're changing from withinDeviate from the form of nothing
Deviate from the norm to something
Deviate from the form of nothing
I deviate, farewell to the tribeSoul volcano, now erupting
Lava swallows what used to be
Soul tsunami, overflowing
Overriding realitySoul volcano, now erupting
Lava swallows what used to be
Soul tsunami, overflowing
Overriding realityDeviate from the form of nothing
Deviate from the norm to something
Deviate from the form of nothing
I deviate, farewell to the tribe
