

# The Eldritch

## Watchtower

Music: White, Keyser

Lyrics: White

Twilight undisturbed - a formidable silence  
The mind rampant in its solitary depression  
Vacuous feelings - the sudden strike of fear

Drawn into the nocturnal empire  
A shadow strikes in the absence of light  
And molds the terror into insanity

Hands claw at familiar faces - running from the unknown

Is there now something real?  
Resist the unseen - the obscure  
Resist the panic - painful foreshadowing  
Destroy yourself - inflicted apprehension  
Awaken subconscious to the primal fear!  
Intrusive misery - the darkness closes in  
Frantic fit of self-preservation  
Impulsive action - screaming confusion  
Imagination overpowers reason
