# Second Chance

## Tinchy Stryder

I can't believe I got a second chance at love
I can't believe I got a second chance at love
I can't believe I got a second chance at love
I can't believe I got a second chance at love
Them mistakes I will learn from them
Now you've changed, you were stern back then
Close the case, where's the lid?
Rebuild the bridge that I burned down then
Back to an item, all resurrected
Now we're back online, we're connected
You're older, I'm wiser
Let's paint this picture perfect
I could have been anywhere by now
But nowhere feels better than home
If you don't know you should know right now
That you're the only that I want
I can't believe I got a second chance at love
I can't believe I got a second chance at love
I can't believe I got a second chance at love
I can't believe I got a second chance at love
Yo, if the vision ain't clear for now
Wipe my eyes and I cleanse them out
Went from up to down, to I nearly drowned
Then now we're back around 360
And I missed you more than you miss me
It's a four letter word that my lips read
Now we're doing it faster in light speed
And the time is right, so kiss me
I could have been anywhere by now
But nowhere feels better than home
If you don't know you should know right now
That you're the only that I want
I can't believe I got a second chance at love
I can't believe I got a second chance at love
I can't believe I got a second chance at love
I can't believe I got a second chance at love
They said the doors were closing in, grab the towel, we'll throw them in
Let's try a second time, if it's wrong we fit the crime
Now the doors are opening, take my hand let's try again

Yeah, we're born to fight, welcome some soldiers in
I can't believe I got a second chance at love
I can't believe I got a second chance at love
I can't believe I got a second chance at love
I can't believe I got a second chance at love
I can't believe I got a second chance at love
I can't believe I got a second chance at love
