

# Death Star

## Atari Teenage Riot

I feel like a death star, abused by control  
Gray without any emotions  
Pull me into the right direction and I will kill you I capture a thousand lives  
I wait for instructions, I can't wait, I can't wait  
Blow me away I only destroy to demonstrate my powers  
Born to observe the confusion  
Your fear is my freedom and I eat you alive My mistakes are too complex  
For you to understand, for you to fight  
My mistakes, my little mistakes, I bring the light  
I bring the light, I bring the light No one survived my shadow ever  
When I need you I start protecting you  
My love gives you life and just my love  
A death star, I am your death star, I am your death star And you can't wait to blow me away, blow me away  
You can't wait, you can't wait, you can't wait  
To blow me away, to blow me away, a death star
