Don't Worry About a Thing

Van Morrison

If this life is driving you to drink
Sitting round what's the use what to think
Well I've got some consolation
Give it to you if I might
You know I don't worry about a thing because
Nothing's gonna turn out rightWell this world's just one big troubled spot
Some have plenty, some have not
I've used to be troubled but
I finally saw the light
Now I don't worry about a thing because I know
Nothing's gonna be alrightYou spend your time trying to be the big winner
The minute you'll get fat somebody else will get thinner
There's always somebody messing with dynamite
You know I don't worry about a thing because I know
Nothing's gonna turn out right
