

Carnival Bizarre (Demo Version)

Cathedral

Ride with me on a shooting star
Through galaxies of death, we chase
Skeletal king of paradise
Cosmic crown is the jewel you wearCarnival bizarre
Freaks and lepers step right up
Circus of macabre
All the devils are rockin' hardSilver mountain of razor blades
The masses ascend to a golden lie
Evil angels in bloody lakes
Await to celebrate their fateCarnival bizarre
Freaks and lepers step right up
Circus of macabre
All the devils are rocking hardMetamorphosed
From the ghost machine we fly
Through circles of gold
To our celestial throneGalaxies have died
Dragons breath has frozen
Chaos in serpent forms
Manifest the universeCrystal phoenix of midnight sky
Carry the burning souls away
Legions of frost we leave behind
Celestial gardens of love we shareCarnival bizarre
Freaks and lepers step right up
Kingdom of macabre
All the devils are rockin' hard
I freak out of the mellow manCosmic psychonaut
Earth into skies last port
Space turning over now
We elevate our thoughts
Wilderness as we abort, oh yeah
