

Big Blue Sun

Adrian Belew

When the summer clouds roll around the sky
And a strand of stars sparkle in the night
Let me take your worry from you
Let me make a world around you
Let me love you like nobody ever tried
When the lazy days come to lay around the lake
And the rays of the sun run among the waves
Don't you think about tomorrow
Don't you drink a drop of sorrow
Don't you look upon the past or wonder why
Let it roll down your shoulder
Let it fall on the floor
I'll be loving you
Like the water loves the shore
Let it fall from your fingers
Let it go, let it come
I'll be loving you
Like the summer loves the big blue sun
The big blue sun
The big blue sun
When the summer clouds roll around the stars in the night
And the lazy days lay around the morning light
Let me take your worry from you
Let me make a world around you
Let me love you like nobody ever tried
Let it roll down your shoulder
Let it fall on the floor
I'll be loving you
Like the water loves the shore
Let it fall from your fingers
Let it go, let it come
I'll be loving you
Like the summer loves the big blue sun
The big blue sun
The big blue sun
