

# We All Must Live Together

## Roseaux

Our families are no longer together  
We have no loyalty between men and women  
One man killed his brother  
And love's an idea we have yet to discover  
Father, father raise your children oh yes  
Mothers, Mothers keep them safe and warm  
Brothers, brothers grow up to become a man  
Sisters, spread the love across the land  
Refrain :  
We all must live, we must live together  
Don't you know that  
We all must love, we must love each other  
Sometimes the world is so cold  
Watching the elderly as they grow  
Where's our respect for the family  
Because without them, we could never be  
Father, father raise your children  
Mothers, mothers keep them safe and warm  
Brothers, brothers grow up to become a man  
Sisters, spread the love across the land (Instrumental)  
Refrain : (x2)  
Don't you that we all must live, we must live together  
You know that  
We must love each other We all must live together  
We must love each other  
Come on children, help me out singin' !  
In that world where we all were created equal  
No men rules, it takes all kind of people  
Go walk your life with you hair hair, hi  
You've got to show just like he and I  
Father, father save your children, oh yes  
Mothers, Mothers keep them safe and warm  
Brothers, brothers grow up to become a man  
Sisters, spread the love across the land  
Refrain : (x2)  
We all must live, we must live together  
You know that  
We must love each other We all must live together  
We must love each other  
Come on children, help me out singin' !
