

Wash On By

La Strada

More you know I want I need it
More down the street we settled the score
Cities bound by a lions roar
More you know I want I need it More sun more bloom by and by
More you more me I ain't gonna lie
In some corner and let it wash on by
No that's over More stars more years fall across the dream
A billion candles burn one flame
Didn't know I was so thirsty.
Fire call our name Give it all Come on come on let it go Looking through death day after day
Can't find a woman to save me
Eye's playin tricks got my back to the wall.
Star in the tree or do you ride for the fall? On a crowded train who am I?
Time you tell don't pass me by.
Look up look down there's bright sun on the wall.
In a tired world you're my wake up call. Come on come on let's go
