## Wu-Tang Clan

Hard days of work, you had a hard day at work baby  
I want you to sit down, relax while I soak you in my mental  
Back rub style, watch this, yo, yo  
Massage, peppermint oil, shampoo and pears  
Cinnamon, aloe, natural for you hair So lather the soap, coconut conditioning  
Honey lather, blood flowing, love glistening  
Motion lotion, breeze, over the ocean  
Lovers, bath crystals, lovers bun scrubbers Hot milk bath, steam shower rubbing  
These will splash long loving in your oven  
Make it off, break it off, till it gets soft  
Passion fruit, pussy cat, want to touch it off In and out, rapers patients, Hershey's Kisses get a style  
Stress reliever soak your feet, air them out  
Brain message, think about pink  
Stress relieving, no dishes in the sink Upper lower, left, right, neck don't play  
Back rub, count on, take me away  
Waterfall beads, streams, plush and lavish  
Come with me through all the damn madness Night breeze at sea, sipping tea you and your queen melodies  
And trees, 85 degrees, jet skis breeze  
Scraping water on chocolate, butter scotch flowers  
Vapor action, tropical sun shower Baby powder, relax, feel for an hour  
Sand suntan, snuggled up snug  
Snowy days, fireplace, oriental rug  
Thugs, lay on the couch, pull it out, perfect balance Chemical stimuli, two tokes off the chalice  
Complete silence, what surround us  
What's the finest, wrapped in cold sheets  
Vanilla apple heat, loop played jazz music, coffee pillow sleeps Breakfast in bed, early morning sun treats  
Sunset level, surprise sunrises, hell  
Lay on the couch, while I clip your toenails  
Dreams of peaches and cream steam secret spells Soft spoken gospel, Barry White Capella  
Violin, good medicine, sound swell  
Sunshine like, the right, without the hell  
Taste sugar, wise storm steam stick Slow dance drink, like nights over Egypt  
Having, stabbing, calm chilling now we rolling  
Company, ice cream licking now we holding  
Gentle force, warm tingle of the golden Open loose, ice cubes, kiss your belly  
Alcohol, palm trees, peanut butter jelly  
Almond twirl, fantastic melodies  
Soon, taste these spoons Wiping me with ton, fly wine, prize storm  
Now it's high noon, raspberry spices

Cherry breath, drink from the mountain, sip the very best  
Sounds of the shore, every winter is a warParadise life, recipe now pour  
Musician, model, gentle mental  
Wash away your sorrow, fantasy Allah  
Put the message in the bottleCarry you through, the threshold, do my duty  
Happy ending, go to rest Sleeping Beauty  
Yo, this is that body shop shit, love, love slam  
Edible underwear, champagne, bubble bathHave your snack on that ass that know what I mean?  
Massaging these melodies put that gangsta shit on the shelf  
Blow winds, blow, through your hair  
Sea breeze sticks and shit, right, rightWhen your around boo  
Come and chop this mother fucking beat  
You stank ass trick
