

# Lady Xanax

## Duran Duran

Here comes the morning light you can't face  
Lie on your bed staring into space  
Watch the time slip gently by  
Don't ask why So many friends but nobody calls  
Can't be alone when the darkness falls  
Got to make it to the party  
Socialize, break the ice Oh Lady Xanax, where were you last night?  
All the cracks in your makeup are starting to show  
Don't think that you realize how far away you go now  
Look into the future and don't be afraid  
Afraid of what is on your mind There in the emptiness deep inside  
You are the one that's been left behind  
So you paint with your mascara  
Social eyes, don't look twice Oh Lady Xanax, where were you last night?  
All the cracks in your makeup are starting to show  
Don't think that you realize how far away you go now  
Look into the future and don't be afraid, afraid Lady Xanax, you're out tonight  
Lady Xanax, you're oh so tired  
Lady Xanax, sleep well tonight Lady Xanax  
Lady Xanax  
Lady Xanax
