

Our Generation

Marcy Playground

Are you a child of the free to be you and me generation
And are you in tune with the world around you?
I am a child of the free to be you and me generation
And I am with you in being in tune We shall bring change to this place
Listen to the whistle of the planet twirlin' through space
Singin' la la la la la la to the human race I believe I am the flower of life, the earth
And the ocean, oh oh
I believe I feel the power of light, vibrate
All around me, oh oh
I believe you are the children of the One
Great Spirit, oh oh Are you a child of the free to be you and me generation
And are you confused with the world around you?
I am a child of the free to be you and me generation
And I am with you in being confused Children children, can you hear it?
Listen to the riddle in the melody by Great Spirit
Singin' la la la la la la, there's nothin' to it I believe I am the flower of life, the air
And the sunshine, oh oh
I believe I am the power of light, the motive
For the universe, oh oh
I believe you are the children of the One
Mother Earth, oh oh
