

# By Now

Novi Novak

See My real ass friends they always around

Real ass friends around

Yo, My real ass friends they always around

My real ass friends always around

The truth is killin me, so the Truth be told

I got a heart that could keep beer cold

I remember the days my soul seemed sold

When the power would flick off cuz the bills got old

1 burner on the stove (1 Burner)

Cuz 3 them broke

And the microwave used to make the circuit blow

Wasn't many meals but dreams I chased

And I hate how it feels that they've gotten away

Cuz shit

I woulda thought by now

I'd have a car and a big ass house

Couple million dollars and a hot ass spouse

But I guess I gotta calm that down.....

Shit, I would thought by now

I'd have enough strength to cover my doubts

More friends than I need so I don't keep count

But I still can't figure it out

See Friends'll be friends, they come and go

Start somebody you do and end you don't know

Was too different, to fit in, with them I stressed

Somethin missin, to have them, as friends I guess

So I'm sorry to the ones I mistaked

I'd have a lot more friends if people weren't so fake

And any girl that I thought was right

Only lasted till she realized that she ain't my life

I started with nothin, no self esteem

I didn't have these skills you see

But I believe ya gotta work to accrue your dreams

Cuz nothing great is achieved through ordinary means

While these....

Stupid artist get caught up in a rap race

Just to chase a fucking dollar with a fat face  
While I carry this heart of stone  
Up hill getting stronger every step I go but shit

I woulda thought by now  
Id have a car and a big ass house  
Couple million dollars and a hot ass spouse  
But I guess I gotta calm that down.....  
Shit, I would thought by now  
I'd have enough strength to cover my doubts  
More friends than I need so I don't keep count  
But I still can't figure it out  
Its like shit.....

I woulda thought by now  
Id have a car and a big ass house  
Couple million dollars and a hot ass spouse  
But I guess I gotta calm that down.....  
Shit, I would thought by now  
I'd have enough strength to cover my doubts  
More friends than I need so I don't keep count  
But I still can't figure it out
