

# Resistance

## Plasma Corp.

Protests in New York  
Listen to the call of the wild  
Brother, sisters carrying signs  
Breathe deep before it's too late  
The sky is falling, burning your eyes  
Down in New Orleans river's boiling  
Nothing living, nothing to eat  
Thank the Lord, daddy's working 8-5  
Paying the doctor, baby's got cancer  
Give and take  
Has all we've learned been wrong?  
Look around at what we've been given  
Maybe we've taken too long  
Resistance, shouts the man on the right  
Can't solve the problem overnight  
Resistance, Listen to the call of the wild  
Burning coal  
Got to keep the company warm as  
The rain keeps killing the trees  
Cut 'em down quick  
Pay the man his wage, he's making paper  
To fuel the "Information Age"  
Out in the Midwest  
Hear the roar of the plough  
Turning grassland into sand  
Got to feed the people more every day  
But the wind keeps blowing the land away  
Give and take  
Has all we've learned been wrong?  
Look around at what we've been given  
Maybe we've taken too long  
Resistance, shouts the man on the right  
Can't solve the problem overnight  
Resistance, Liberal opposition crying violation  
Stop the madness  
Resistance, Through the din, one voice we should hear  
Resistance, Listen to the call of the wild  
There's no easy solution  
The price is high, and it's time to pay

Turn of the century vision  
Focused on a better way  
Resistance, shouts the man on the right  
Can't solve the problem overnight  
Resistance, Liberal opposition crying violation  
Stop the madness  
Resistance, Through the din, one voice we should hear  
Resistance, Listen to the call of the wild
