

Pain

This Beautiful Republic

We are here together, its been so long
Ive waited forever for this day to come
And I wont leave you alone tonight
Youre my heart moving life insideWe won't fall again if you will let me lead
Well fall in love if you will hold to me
Never let go, endure the pain to find no pain at allForget all the records, previous lovers
Look into my eyes to dissolve the others
Cause I know where you have laid tonight
And Im just one step away tonightWe won't fall again if you will let me lead
Well fall in love if you will hold to me
Never let go, endure the pain to find no pain at all
No pain at allSay that you need me
And I can give you everything your hearts been craving
Cause once Ive held your hand
I cannot stand to see it waving goodbyePlease dont go, stay with me
Just stay with me, just stayWe won't fall again if you will let me lead
Well fall in love if you will hold to me
Never let go, endure the pain to find no pain at all
No pain at all
