

# The Kelly Affair

## Be Your Own Pet

I'm in a band now, we're called The Carrie Nations  
Man, you'll see we're really going places  
We took our act down to LA and met Z-Man at the party  
It could be dangerous living in this valley  
Everybody here parties all the time  
Everybody here's got sex on their minds  
It could be dangerous living in this valley  
Everybody here parties all the time  
Everybody here's got sex on their minds  
Everybody here is popping pills  
I got a dream and it's gonna come true  
Z-Man will make us stars, leave it  
And you take things one at a time and just relax  
Get some acid or smoke some grass  
It could be dangerous living in this valley  
Everybody here parties all the time  
Everybody here's got sex on their minds  
It could be dangerous living in this valley  
Everybody here parties all the time  
Everybody here's got sex on their minds  
Everybody here is popping pills  
Bentley, Rolls, Bentley, Rolls  
It could be dangerous, it could be dangerous  
It could be dangerous living in this valley  
Everybody here parties all the time  
Everybody here's got sex on their mind  
Everybody here parties all the time  
Everybody here's got sex on their mind  
Everybody here is popping pills
