Make Believe

Tommy Lee

It's breaking in me, it's needless to say
Now this part is done, when did I go wrong
You're starting to fade, you're falling away
Leave me standing still, on this windowsill
And I'll make believe that it's okay
If I find out, where your minds at
It can make me believe that you're mine
When I find out, where your minds at
It can make me believe that you're trying
It's needless to say, you're walking away
Why can't we rewind, what's been left behind?
I'm starting to fade, I'm falling away
Have your feelings gone to another one
And I make believe that its okay
If I find out, where your minds at
It can make me believe that you're mine
When I find out, where your minds at
It can make me believe that you're trying
[Incomprehensible]When I find out, where your minds at
If I find out, where your minds at
It can make me believe that you're mine
When I find out, where your minds at
It can make me believe that you're trying
You're starting to fade, you're falling away
Have your feelings gone to another one
You're starting to fade, you're falling away
