

# Blues Magic

## Santana

Have you ever lost a love,  
Drowning in your tears,  
And you swear your never ever gonna love again,  
but your counting all the years,  
you just live through the day,  
trying not to hurt every night,  
well there's magic in the blues,  
magic that'll make it alright  
You just need a little lovin'  
someone holding you,  
well the sky is gonna open,  
and the sun will shine for only you.  
You just live through the days,  
tryin' not to hurt every night.  
You just need a shot of the magic,  
everything is alright  
everything is alright  
everything is alright
