# Come To Me

## Dispatch

Cast a spell on me, don't shake my constellation
I'll be riding out all damn time
Man, I got so lost, such a cost
I let you down
See the love shining down on you
Tell me things, all that we can do
Come to me, come to me, for you need it
Come to me, come to me, for you need it, for you need it
Underneath it all I cast in my chips to win.
I thought I looked so steady,
baby I was ready
but I find I lost it

See the luck shining down on you
Tell me things, all that we can do
Come to me, come to me, for you need it
Come to me, come to me, for you need it, for you need it
I'm always up in the clouds, I don't wanna come down!
I'm always down in the clouds, I don't wanna come down
I don't wanna come down, I don't wanna come down
I don't wanna come down, I don't wanna come down
I don't wanna come down, I don't wanna come down
I don't wanna come down, I don't wanna come down
I don't wanna come down, I don't wanna come down
I don't wanna come down, I don't wanna come down
