Love Collision

Dru

We been on the same track headin' for each other,
A collision
And I've been tryin' to find a way to tell you I'm in love,
the decisionI've been stayin' far away til' I think it's right,
I've been waitin' for a sign, waitin' for the time,
That you, that you will be ready to listen,
To this decisionIt's all about us
It's all about love
Think about all we could have been,
If we ever spoke up,
If we ever hooked up,
If we ever stopped runnin', runnin', runnin'.Cos now we've come to the end,
There's nowhere left to hide
When two hearts collide
Two hearts collide
We can't deny this love collisionThere's nothing left to fight
When two hearts collide
Two hearts collide
Get you inside this love collisionI been tryin' to read your mind, it feels like forever,
I've been dyin'
Since the day that we met I wanted to be together,
I'd be lyin'
Keep on tryin' to tell myself that we better friends,
Tryin' hard to but it's never easy to pretend,
That I, that I don't have feelings in my head,
But I'm fightin'It's all about us
It's all about love
Think about all we could have been,
If we ever spoke up,
If we ever hooked up,
If we ever stopped runnin', runnin', runnin'.Cos now we've come to the end,
There's nowhere left to hide
When two hearts collide
Two hearts collide
We can't deny this love collisionThere's nothing left to fight
When two hearts collide
Two hearts collide
Get you inside this love collisionWe were meant to be
We were meant to love

We was tight as friends,
And it ain't enough
Feel the energy
Sparks fly when we touchIt's all about us
It's all about love
Think about all we could have been,
If we ever spoke up,
If we ever hooked up,
If we ever stopped runnin', runnin', runnin'.Cos now we've come to the end,
There's nowhere left to hide
When two hearts collide
Two hearts collide
We can't deny this love collisionThere's nothing left to fight
When two hearts collide
Two hearts collide
Get you inside this love collision
