Open Up Your Heart

R.I.O.

We need unity between each other (all of us right now)
One memory flows in the air (let's think about)
So brothers and sisters, this we discovered (honesty)
Out roots and destiny push all the clouds away
Open up your heart and you will feel
Open up your eyes and you will see (open up your eyes)
Everybody's yearning, keep the fire burning
When love sets us free
Open up your heart and you'll believe
Sometime the truth goes undercover
Get into the move and let it flow (like the wind, you know)
Go people around me, stand up like brothers
We're rising upon the sky to fly away
Open up your heart and you will feel (I know you'll feel it)
Open up your eyes and you will see (open up your heart)
Everybody's yearning, keep the fire burning
When love sets us free
Open up your heart and you'll believe
