Made To Lie

Default

It's late again
Across the bar her night just began
Her search will end
She spots her tonight friend but thenShe's been made to lie
She's out of the airwaves and into the spotlight
She can't make it right
There's got to be some way to bring back her first sightShe woke up alone
While he slept she took off for home
Left a note by the phone
No number or name to be shown but thenShe's been made to lie
She's out of the airwaves and into the spotlight
She can't make it right
There's got to be some way to bring back her first sightDay to night
Never ending fight
Trapped forever aloneShe's out of the airwaves and into the spotlight
She can't make it right
There's got to be some way to bring back her first sightShe's been made to lie
She's out of the airwaves and into the spotlight
She can't make it right
There's got to be some way to bring back her first sight
