

Underwater Bimbos From Outer Space

Every Time I Die

I want to be dead with my friends!
I want to be dead with my friends!

Wide eyed brilance tide in them rags.

I want to be dead with my friends!
I want to be dead with my friends!

When the iron sharpens the iron!
When the iron sharpens the iron!
When the iron sharpens the iron!

Sharpens the iron!

I want to be dead with my friends!
I want to be dead with my friends!

Motherload unforgettable END!

I want to be dead with my friends!

Let boredom cease the beating of out purple hearts!

Against this even Gods fight violently in vain!

What chance could we have stood?

We're the last of the lost but now we are the first of the fashionsbly late!

loved ones decompose, you'll dance around their bones.

most of us are holy gost.
all of us are holy gost.

loved ones decompose, you'll dance around their bones.

most of us are holy gost.
all of us are holy gost.

We made the scene when we made a scene and though it was brief it meant everything!

Oh what a pity, now they're bound to make us Saints!
Oh what a pity, now they're bound to make us Saints!

Against this even boys fight violently in vain!

What chance could we have stood?!

We're the last of the lost but now we are the first of the fashionsbly late!

I refuse to be the only man in a mass grave!
I refuse to be the only man in a mass grave!
I refuse to be the only man in a mass grave!

You were all there with me!
You were all there with me!
You were all there with me!
