White Lines & Red Lights

Between The Trees

Late night, driving home together
And at red lights we press our lips together
And we're holding tight now slow it down now
Let's take our time
Let the moment last
Until it feels right
Holding back
And not getting to carried away
Let the music fade
'Cause you are the brightest star
I'm in love with who you are
And you are the brightest star
I'm lost without your love
We are in each others arms
Just like a movie scene
'Cause as we're leaning in
The light decides to turn green
Me and you together
This is getting better
Just butterflies won't do
I don't want just red lights
I want more of these nights
'Cause baby I love you
You and me is what matters most
It's not the intimacy that brings me
Closer to you
